

A4 - Das R-Paket tmap

Jan-Philipp Kolb

22 Oktober 2018

Inhalt dieses Abschnitts

- Das Paket `tmap` wird vorgestellt.
- Die Datenquelle `naturalearthdata` wird vorgestellt.
- Es wird gezeigt, wie man Karten von Europa, der Welt und einzelnen Ländern

Das Paket tmap

Thematische Karten

- Mit dem Paket **tmap** kann man thematische Karten erzeugen
- Die folgenden Beispiele basieren auf der **Vignette** des Paketes .

```
install.packages("tmap")
```

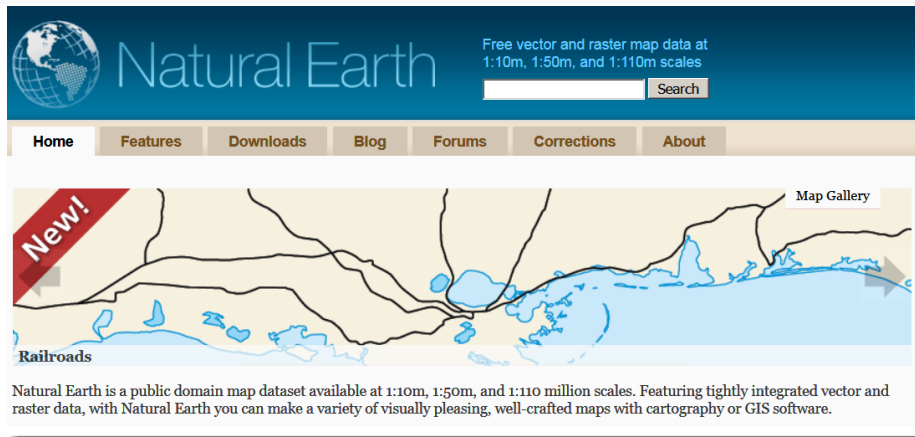

```
library(tmap)
```

Der Europe Datensatz

Natural Earth

- Datensatz enthält Informationen von **Natural Earth**

`data(Europe)`

The screenshot shows the Natural Earth website interface. At the top, there is a dark blue header with a globe icon on the left, the text "Natural Earth" in the center, and a search bar on the right. Below the header is a navigation bar with links: Home, Features, Downloads, Blog, Forums, Corrections, and About. The main content area features a map of Europe with a red "New!" banner in the top left corner. A label "Railroads" is visible on the map, and a "Map Gallery" link is in the top right corner of the map area. Below the map, there is a paragraph of text describing the dataset.

Free vector and raster map data at 1:10m, 1:50m, and 1:110m scales

Search

Home Features Downloads Blog Forums Corrections About

New!

Map Gallery

Railroads

Natural Earth is a public domain map dataset available at 1:10m, 1:50m, and 1:110 million scales. Featuring tightly integrated vector and raster data, with Natural Earth you can make a variety of visually pleasing, well-crafted maps with cartography or GIS software.

Der Befehl `qtm` aus dem Paket `tmap`

Schnelle thematische Karte

- Mit dem Befehl **`qtm`** kann man eine schnelle thematische Karte erzeugen
- Beispiel aus der **Vignette** zum Paket `tmap`

`qtm(Europe)`

Der Europa-Datensatz

Um mehr Farbe in die Karte zu bekommen

Entwicklungsstand der Wirtschaft

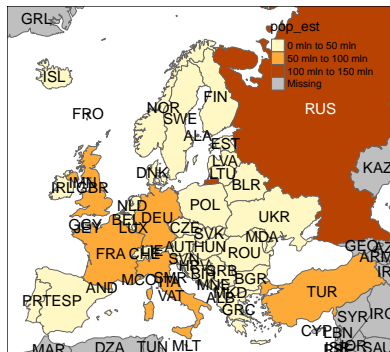

```
qtm(Europe, fill="economy")
```

Eine Karte mit Text

Bevölkerung

```
qtm(Europe, fill="pop_est", text="iso_a3")
```

Dieses Schema passt besser:

GDP

```
qtm(Europe, fill="gdp_cap_est", text="iso_a3",  
    text.size="AREA", root=5, fill.title="GDP per capita",  
    fill.textNA="Non-European countries", theme="Europe")
```

Themen des Europa-Datensatzes

Verfügbare Variablen im Datensatz

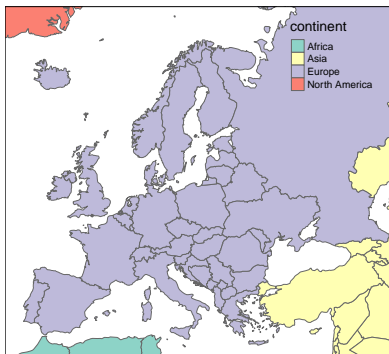

- **ISO Klassifikation**
- Ländername
- Ist das Land Teil Europas?
- Fläche, Bevölkerung, Bevölkerungsdichte,
- **Bruttoinlandsprodukt**
- Bruttoinlandsprodukt **zu Kaufkraftparitäten**
- Ökonomie, Einkommensgruppe

Der Europa Datensatz - Variablen und was dahinter steckt

	iso_a3	name	sovereight	continent	part
5	ALB	Albania	Albania	Europe	Southern Europe
6	ALA	Aland	Finland	Europe	Northern Europe
7	AND	Andorra	Andorra	Europe	Southern Europe
10	ARM	Armenia	Armenia	Asia	NA
17	AUT	Austria	Austria	Europe	Western Europe
18	AZE	Azerbaijan	Azerbaijan	Asia	NA
20	BEL	Belgium	Belgium	Europe	Western Europe
24	BGR	Bulgaria	Bulgaria	Europe	Eastern Europe

Die Variable continent

```
qtm(Europe, fill="continent")
```

Die Variable part

```
qtm(Europe, fill="part", fill.title="Teil von Europa")
```

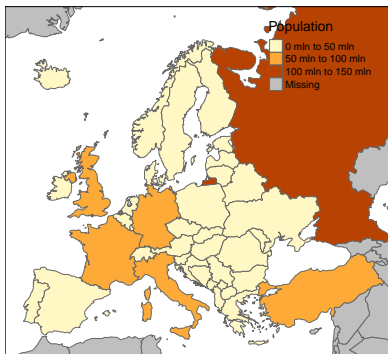

Die Variable area

```
qtm(Europe, fill="area") # Russia is huge
```

Bevölkerung

```
qtm(Europe, fill="pop_est", fill.title="Population")
```

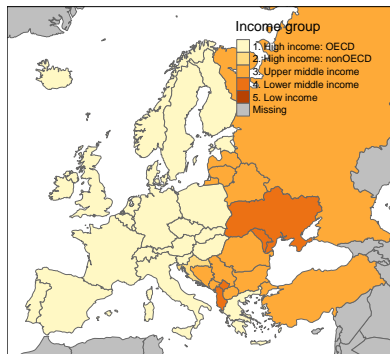

Ökonomie

```
qtm(Europe, fill="economy")
```

Einkommensgruppe

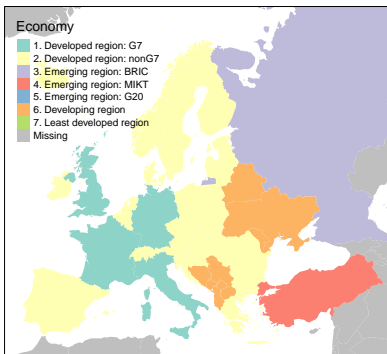

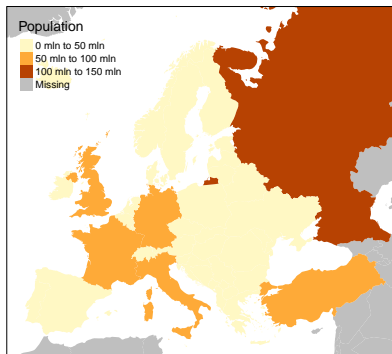

```
qtm(Europe, fill="income_grp",fill.title="Income group")
```

Zwei Karten

Bevölkerung und Entwicklungsstand

```
tm_shape(Europe) +  
  tm_fill(c("pop_est", "economy"),  
    title=c("Population", "Economy"))
```

Der Datensatz World im Paket tmap

Ähnlich wie der Europe Datensatz nur für die ganze Welt

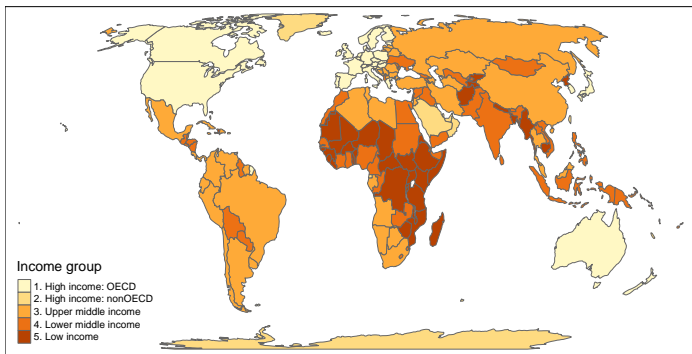

data(World)

9388	EA16	7.4	12.0
9397	EA15	7.3	12.0

Nutzung des Paketes tmap mit eigenen Daten

```
library("tmap")  
data(Europe)
```

Die Daten matchen

```
iso_a2<- substr(Europe@data$iso_a3,1,2)  
ind <- match(iso_a2,Unemp$GEO)  
Europe@data$Val2007M12 <- Unemp$Val2007M12[ind]  
Europe@data$Val2013M01 <- Unemp$Val2013M01[ind]
```

Eine Karte erzeugen

```
qtm(Europe, c("Val2007M12", "Val2013M01"))
```

A4A Übung: Visualisierung von Eurostat Daten

- Verbinde die Statistik zur Sparquote mit den Kartendaten.
- Stelle die Daten in einer Karte dar.

Kleine und viele Karten

```
tm_shape(Europe[Europe$continent=="Europe",]) +  
  tm_fill("part", thres.poly = 0) +  
  tm_facets("name", free.coords=TRUE)
```

Das Paket tmap zitieren

```
citation("tmap")
```

```
